OBSERVATIONS

The study consisted of 104 victims of traumatic head injury, brought to the mortuary of Maulana Azad Medical College and Lok Nayak Hospital, Delhi between the period of March, 2000 to April, 2001

AGE DISTRIBUTION

The age of the victims varied from 1-80 years. The peak incidence was observed in the age group 31-40 years comprising 23.6% of the cases. It was also observed that 22.1% belonged to the age group 21-30 years. Thus 55.7% of cases comprised of age group of 21-40 years in the study. Individuals in the age group 0 to 10 years were the least affected 4.8% followed by older people i.e. 60 years and above in 5.7% of total cases.

Age range	Number	Percentage
0-10	5	4.8
11-20	16	15.3
21-30	23	22.1
31-40	24	23.6
41-50	19	18.2
51-60	10	9.6
61-70	5	4.8
71-80	2	1.9
Total	104	100.0

The lowest age of the victim was 3 years and the highest age observed was 80 years.
