(Editor's Note: This is one of the two reviews which rated the book at full 10. The other was from John Williamson from UK.)

I received this work from Dr. Anil Aggrawal after agreeing that I would attempt to review the work. I was not far into my reading when I discovered the masterpiece that it is.

> *...This is certainly a book filled with original thought. It is a must read for those interested in the evolution of mass murder. The book is unsurpassed. The biblography is a jewel box. I certainly recommend the work...*

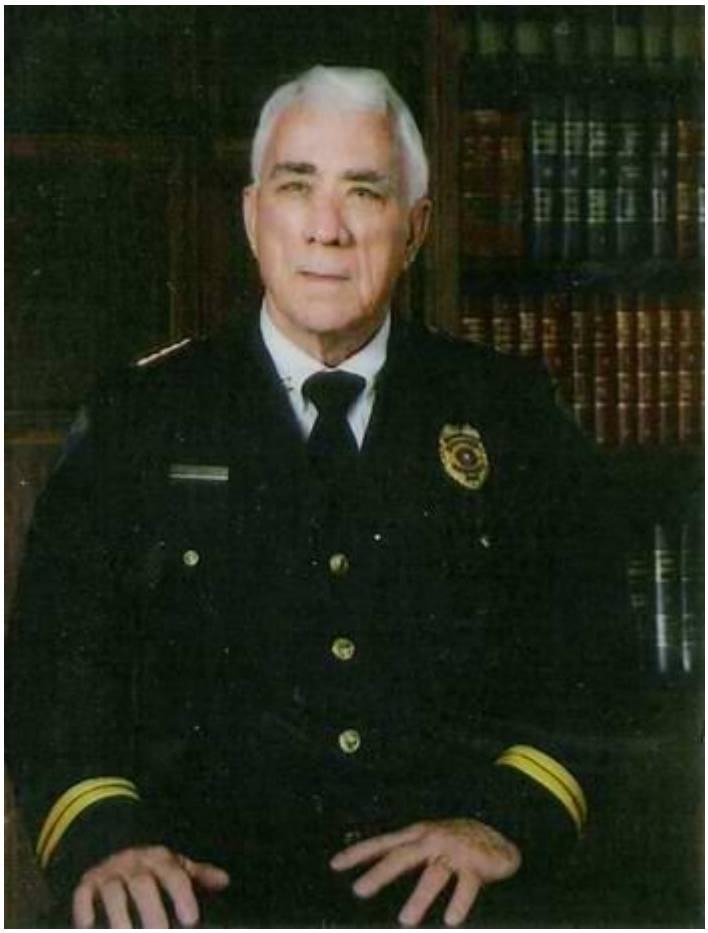

The book is a MASTERPIECE of ORIGINAL THOUGHT. The book itself is a self tribute though I know as he knows his ideas and his thougths were not of himself rather he was laying a path toward a hoped for eventual anwser and solution to why WE KILL OURSELVES in manners such as demonstrated in *TREBLINKA*. The ideas he expressed overshadow any current thinking of unplanned mass murder.It actually sets out the histrory of mass murder. His thinking almost identifies these types of mass murderers,the logistics of capture, captivation and maintenance of the victims as well as a well defined process of extermination akin to mass production in industry.. The book probably describes a greater understanding of the well oiled history of man's efforts of the extermination of entire races of people.

He explains how it is his belief that man learned to kill man from having killed animals. He compresses time to the circa present to the supported belief that genocides are committed by people with psychopathic personalities who brought about himself thousands of the same who are actng under what the author appears to believe is now an innate mind set.

This is certainly a book filled with original thought. It is a must read for those interested in the evolution of mass murder. The book is unsurpassed. The biblography is a jewel box.

I certainly recommend the work. The author cannot be praised highly enough not only for the freshness and originality of his work but the tremendous labor that went into the production.
