This is an instructive and entertaining book for those public and private investigators who are potential undercover agents. This is the much improved second edition, and approaches the topic from three angles: how to handle informants, how to investigate suspects, and the role of an

undercover agent. Mr. Motto, the first author of the book was the recognized expert in undercover operations for the Secret Service. Dale L. June, the second author split his Secret Service career between protective assignments with the President and other high-ranking officials and dignitaries.

The book places emphasis on the law enforcement agent, but does not overlook the private investigator who may be assigned to work in an undercover role in business or industry. The book has a good glossary section at the end, and two useful appendices. A chapter on Questions and Answers enlivens the book. Some examples:

- Should a police officer or agent be armed while working undercover?
- Should undercover agents use pagers and cellular telephones?
- Should an agent be covered at all times while working in an undercover capacity?

And so on!

The answers provided are lucid and explanatory. All in all, an eminently readable book. Heartily recommended to all engaged in law enforcement.
