We keep receiving books for review from various publishers. However some books are of such paramount importance that we at the journal office thought one review may not be able to do justice to that book. One opinion may be slanted, perhaps by the individual tastes and preferences of the reviewer. Reviewers from different continents, nations, even different parts of the same nation may perceive a book differently. Why not send books to two or more different reviewers and get their opinion. We requested several publishers to do that and they obliged.

From Volume 3, Number 1, January - June 2002, we started reviews of certains books of paramount importance as "featured books". The first book to be featured on our journal was Ecotoxicology: The Study of Pollutants in Ecosystems by F. Moriarty (Published by Academic Press). Review of that book, as well as the combined index of reviews of all featured books can be accessed by clicking here.

This time we sent several books to multiple reviewers for inclusion in our Featured Reviews section. We are happy to publish the reviews of the first book in this section. The book is Self-Assessment in Forensic Medicine & Toxicology: MCQs in Forensic Medicine & Toxicology by V V Pillay and B K Bastia (Published by Paras Medical Publisher), to two reviewers from different continents. Both of them are leading lights in their subjects and are widely respected all over the world. Here are both the reviews.

Review 1 by Ronald Wright, USA

Review 2 by Sivaloganathan, UK
