We keep receiving books for review from various publishers. However some books are of such paramount importance that we at the journal office thought one review may not be able to do justice to that book. One opinion may be slanted, perhaps by the individual tastes and preferences of the reviewer. Reviewers from different continents, nations, even different parts of the same nation may perceive a book differently. Why not send books to two or more different reviewers and get their opinion. We requested several publishers to do that and they obliged.

From the current issue we are starting reviews of certains books of paramount importance as "featured books". The first book to be featured on our journal is Ecotoxicology: The Study of Pollutants in Ecosystems by F. Moriarty (Published by Academic Press).

The book was sent to two reviewers, one of them a leading light in Asia on the subject of toxicology (Professor V.V. Pillay). He is himself an author of several remarkable texts in toxicology. The other book was reviewed at the journal office by the Editor-in-Chief himself. Here are both the reviews.

Review 1 by Professor V.V. Pillay

Review 2 by Professor Anil Aggrawal
