I am pleased to recommend Dr. V.V. Pillay's book entitled "Comprehensive Medical Toxicology" to my colleagues in clinical toxicology. This is a reference book that will be of greatest value to the practicing clinical toxicologist rather than students. It is encyclopedic like Martindale or Baselt or some of our data bases but much more interesting to read. I found it to be authoritative and current for all of the agents that I checked and it will be a valuable addition to the books that I keep next to my telephone. I would rate it at 9.0 on the scale provided to me by Professor Aggrawal, the editor-in-chief of this journal.
