Site of the Semester

Dr. R.K. Gorea's Forensic Site - A storehouse of information (Dr. R.K.Gorea is a hugely renowned and successful forensic physician and pathologist working in Punjab, India. He made this excellent site, which is easily one of the best sites on Forensic Medicine available today. The site is a huge repository of information on matters related to forensics. The site gives tips of practical importance, in addition to several important links and other tid bits about Forensic Science, pathology and medicine. This has been voted the site of the semester by our Editorial board. Highly recommended. In case you want to get in touch with Dr. R.K. Gorea, you can do so by clicking here)

Highly Recommended Links

- How long should we wait for Justice? by Dr. Mukesh Yadav
  (A very informative piece written by Mukesh Yadav. Dr Mukesh Yadav is currently a Profesor and Head of the Department of Forensic Medicine at the Muzaffarnagar Medical College, Muzaffarnagar (contact:). One of the most energetic and intelligent persons in the field of forensic medicine, he passed from a college whose MD in Forensic Medicine is not recognized till date. Naturally he has become a crusader for the injustice meted out to all youngsters who are being duped by the Government in the name of providing MD degress, which are as yet unrecognized. A must read for all!

Blogs

Blogs have become the rage of everyone these days and forensic scientists are no exception. Indian forensic scientists and forensic pathologists are rapidly making their presence known on the

blogosphere. Two most important forensic blogs by Indian scientists that have come up in recent times are by Swapnil Agarwal of Belgaum and A.J. Patowary of Assam. I have enjoyed them thoroughly and I am sure all our readers would have the same experience.

- Dr. Swapnil Agarwal's Blog. (Dr. Swapnil Agarwal is a young and hugely successful forensic pathologist of India. Some good topics on his blog at the time of this writing include "Maintenance Of Medical Records" and "Legal Duties Of A Medical Practitioner In Dealing With Poisoning Cases". He has also started a medicolegal helpline to help all medical practitioners who face difficulties in medicolegal issues. This is indeed a very thoughtful and innovative step taken by Dr. Agarwal, and perhaps the first of its kind anywhere in the world. He has also written a bestseller in forensic medicine, which was reviewed in this journal in its last issue. His blog is highly recommended. In case you want to get in touch with Dr. Swapnil Agarwal, you can do so by clicking here)
- Dr. A.J. Patowary's Blog. (Dr. A.J. Patowary is another young and hugely successful forensic pathologist of India. Some good topics on his blog at the time of this writing include "virtopsy", "Modern Mortuary Plans" and "The fourth incision - a cosmetic autopsy incision technique". One can see architectural plans of modern mortuaries in his blogs, which would undoubtedly be very helpful to all concerned with autopsies. One can also find Dr. Patowary's picture and his complete CV on his blog. This is another forensic blog which impresses everyone. In case you want to get in touch with Dr. A.J. Patowary, you can do so by clicking here)
