ANIL AGGRAWAL'S
Internet Journal of Forensic Medicine and Toxicology
The world's first online journal devoted entirely to forensic medicine and toxicology · Published 1 January and 1 July

VOL. 10, NO. 1 · JANUARY – JUNE 2009
Downloaded from www.anilaggrawal.com · ISSN 0972-8074 (Online) · https://www.anilaggrawal.com/ij/vol_010_no_001/others/thesis/11_bibliography.html

# Bibliography

1. Strong JP, McGill HC. The Natural History of Coronary Atherosclerosis. Am J Pathol, 1962; 40:37-49.
2. Crawford,T., Dexter,D., Teare,R.D., Coronary-Artery Pathology in Sudden Death from Myocardial Ischaemia. The Lancet 1961; 1:181-185.
3. McGill HC. Fatty Streaks in the Coronary Arteries and Aorta. Lab Invest 1968;18:560-564.
4. Strong JP et al. Prevalence an Extent of Atherosclerosis in Adolescents and Young Adults. JAMA 1999; 281:727-735.
5. Crea F, Biassucci, Bufton. Role of inflammation in pathogenesis of unstable coronary artery disease. Am J Cardiol 1997; Sept 4:10E-16E.
6. Mallory GK, White PD, Salcedo-Slagar J. The speed of healing of Myocardial Infarction. A study of pathologic Anatomy. Am Heat J 1939;18:647-671.
7. Wachstein M, and Meisel E. Succinic dehydrogenase activity in myocardial infarction and in induced myocardial necrosis. Am J Path 1955; 31:353-365.
8. Jennings RB, Kaltenbach JP and Smetters GW. Enzymatic changes in acute Myocardial Infarction. Arch Path 1957; 64:10-16.
9. Kolin A, Neoral L. Use of an enzymatic macro-reaction in postmortem diagnosis. Cas lek Lesk 1960; 99:363-368.
10. Sanditter & Jestadt. TTC als Reduktionsidikater Makroscopik diagnosedes frischen herzinfarktes Zent Allg Pathol 1958; 97:97:188-9.
11. Jennings,R.B., Sommers.H.M., Smyth,G.A., Flack,H.A., and Linn,H. Myocardial necrosis induced by temporary occlusion of a coronary artery. Arch Path 1960; 70:68-78.
12. Standjord, P.E., Thomas, K.E. , White , L.P. - Studies on Isocitric and lactic dehydrogenase in experimental Myocardial Infarction. J. Clin. Invest. (1959) 38, 2111-2118.
13. Klionsky, B. - Myocardial Ischemia and early Infarction. A histochemical study. Amer. J. Path (1960) 36, 575-591
14. Graves KM, koepke JA, La Fond DJ and Ross A. Myocardial Enzymes in Myocardial Infarction. Amer J Clin Path 1962; 37:282-288.

15. Nachlas MM and Shnikta TK. Macroscopic identification of early myocardial infarcts by alterations in dehydrogenase activity. Am J Path 1963; 42:379-405.

16. Fine G, Moreales A and Screpella JR. Experimental myocardial infarction. A histochemical study. Arch Path 1966; 82:4-8.

17. Ramkissoon RA. Macroscopic identification of early myocardial infarction by dehydrogenase alteration. J Clin Path 1966; 19:479.

18. Brody GL, Bleeding WA, Belding RM and Feldman SA. The identification an delineation of myocardial infarction. Arch Path 1967; 84:312.

19. Jimmy LC, Laughlin VW, Flowers NC, and Horan LG. The ischaemic zone surrounding acute myocardial infarction. Its Morphology as detected by dehydrogenase staining. Am J Heart J 1968; 76:650-659.

20. McVie JG. Postmortem detection of in apparent myocardial infarction. J Clin Path 1970; 23:203.

21. Andersen JA and Hansen BF. The value of Nitro BT method in fresh myocardial infarction. Amer heart J 1973; 85:611-619.

22. Hansen BF. Heart autopsy in ischaemic heart disease. An autopsy protocol. Acta Path Microbiol Scand. A 1978; 86:241-244.

23. Gregersen N. Myocardial changes in sudden unexpected coronary deaths. Foren Sci Intl 1979; 13:183-186.

24. Varga, M. Zsonda, L. A simple method for postmortem detection of acute myocardial infarction. Foren Sci. Int. 1982; 19: 85-91.

25. Luna, A. Villanueva, E., Castellano, M., Jimenez, G. The determination of CK, LDH and its isoenzymes in pericardial fluid and its application to the post-mortem diagnosis of myocardial infarction. Foren. Sci. Int. 1982; 19: 85-91.

26. Knight B and Saukko P. Evaluation of Eosin-Flourescence in the diagnosis of sudden cardiac death. Foren Sci Intl 1989; 40:285-290.

27. Luna A, Lachica E, and Villanueva. Comparison of different techniques for the psotmortem diagnosis of myocardial infarct. Foren Sci Intl 1988; 38:21-26.
